SEO ASSESSMENT AND SUBMISSION REPORT

www.samedaymoney.co.uk

21 November 2011

CONTENTS

- Summary - What we suggest you do!
- SEO On-page & keyword(s) factor analysis
- Off-page factors analysis
- Detailed Meta Tag analysis
- Your New Meta Tags
- Full submission report

IMPORTANT - Every time we submit your Website fresh inbound links will be created via the latest directory listings and therefore over time your site will move up the rankings. Cancellation of this service will decrease the number of relevant backlinks and have a negative impact on your rankings. It is also very important that the SEO keyword report is carried out every 3 months so we can react quickly when the Search Engines change/update their algorithms.

SUMMARY

WHAT WE SUGGEST YOU DO!

Having looked at your SEO on-page, Keyword and Meta tag analysis. We would suggest the following course of action in order to optimize your site for your keywords.

1. Insert your new Meta Tags (located within this report) in to the HTML of each page of your Website. This is very simple and should take either yourself or your Web Designer no more than 10 to 30 minutes depending on the number of pages you have. This will correct most of the issues contained within the SEO On-page and keyword(s) factor analysis.
2. Add your chosen keywords and phrases in to the body text of each page of your website more frequently BUT not too frequently. We suggest trying to mention each one of your keywords up to 3 times on each of your sites main pages. Too few times and your site will not seem relevant enough to the search engines but too many times and you could be classed as a spammer.

SEO On-page & Keyword(s) factor analysis

We use industry leading software to produce a full SEO report.

We will crawl your web site, similar to a search engine, and report on the strengths and weaknesses of the website's overall structure and then offer suggestions for improvement. By following the detailed information provided you will be able to optimize your web pages for top search engine rankings. Its findings are listed below. Each quarter we suggest that you make the changes suggested to your site. It is very important that this analysis is done every 3 months because the search engines (mainly Google) are always updating areas of a website that need to be optimized and therefore we are always updating the SEO analyser so that you are able to react to these changes fast and stay ahead of the competition.

SUBMISSION REPORT

Below are the main Search Engines and Directories that we have submitted your Website to.

It's very important that this is done every 3 months in order to refresh your content on the search engines and build fresh inbound links (backlinks) on the directories/link pages. This will over time help your ranking by building 1000s of relevant inbound links (backlinks). Due to the quantity we are unable to put all of them in this document so only the most important ones are listed below.

Want to build Backlinks faster? We offer two optional extras designed to help with this. Guaranteed Top 10 Placement and Guaranteed Rapid Backlinks can be ordered via your control panel. Although you do not need any of the optional extras to see an impact they will help certain types of websites achieve their goals more quickly.
